QUBIC Smart Booths

Transform your space.

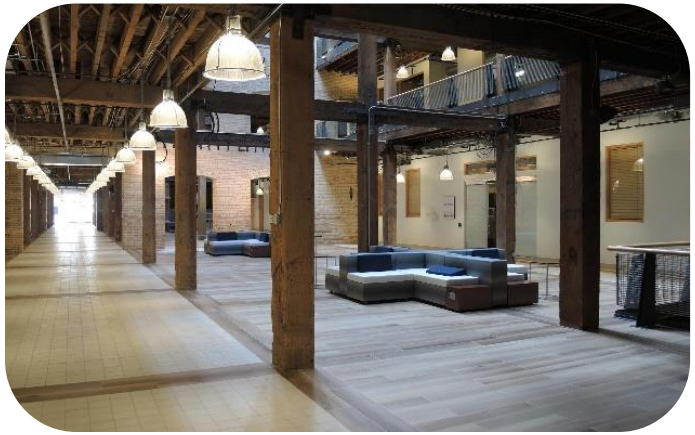
Powered by BOOQED

What Is QUBIC?

QUBIC is a **modular smart booth system** that delivers a quick and cost-effective way for landlords and corporate tenants to create and manage private areas within their buildings or offices.

- **Cost-effective:** no expensive construction or fit-out
- Transform and activate any work, meeting or lobby area within an office into multi-functional amenity spaces **within one day**.
- **“Smart” system** supports user bookings of the booths, automated access control, and payments.
- Can be implemented in both **unused and/or existing spaces**
- **Real-time management data** tracks usage and assists with capacity management and planning

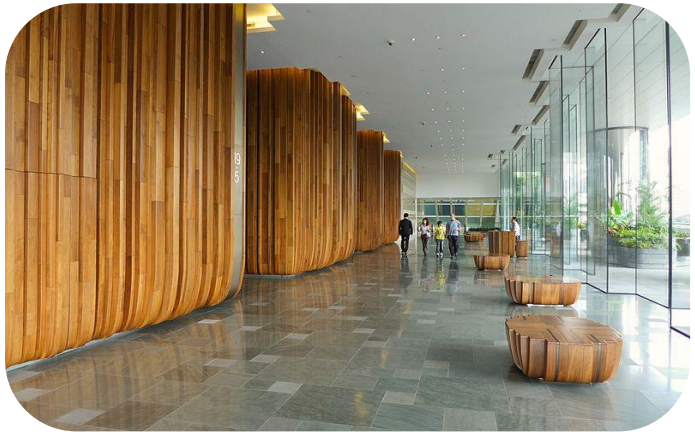
Where Can QUBIC Be Used?



Empty floor

Transform any unused areas immediately into private, bookable spaces

F&B



Lobby area

Any idle space

Office space

What Are The Benefits?

- Quickly create **private areas** for people to work or meet

- Modular system **eliminates the need for messy renovations**

- **Project completion within 1 day** ensures minimal disruption to operations

- **Top-of-the-line quality** for 60% the price of similar premium booths and up to 70% less than traditional office fit-outs

- **Smart capabilities** provide owners with booking functionality, monetization and analytics to track utilization for future planning

QUBIC Components

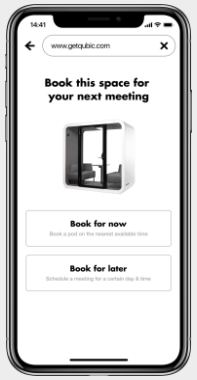
Access Control

- Fully automated, no-touch solution
- Manage use of the booth
- No-WiFi connection required

Modular Booths

- QUBIC booths come in 4 sizes, from a 1-pax phone booth to a 6-pax meeting room
- Proprietary access control technology integrated with the booking app
- Customizable options for color and external finishes
- Additional modules options (e.g. anti-virus nano-coating, AV Setup)
- **Can be purchased separately**

Software



Web app supports real-time bookings and space management for work and meeting spaces

- Simple booking confirmation and access (for meeting rooms) via QR code
- 'Grey-label' solution promoting your brand
- Potential integration into existing client digital assets

Admin portal provides work and meeting space management

- Manage availability
- Usage data and analytics

Hardware Features
